

Knit Foulds Pvt. Ltd.

INDIA

METAL SPINNINGS

- * Roof Exhaust Fans
- * Centrifugal Upblast Exhaust Fan
- * Downblast Spun Aluminium Exhausters
- * Gravity Relief Exhausters Ventilator
- * Roof top Exhausters
- * Gravity Vents
- * Roof & Wall Ventilators

COMPANY PROFILE

Knit Foulds is 50 years old business house based in the Kapurthala, Punjab, India. The unit were established in 1964 for manufacturing of power transmission belting in technical collaboration with Leripa, Austria and I. Foulds & Son Ltd. Keighly U.K. The company today is a supplier of high torque power transmission belting to most of the corporate houses of India.

Later the firm diversified into manufacturing of cable ties which are self locking zip ties widely used in the electrical industry.

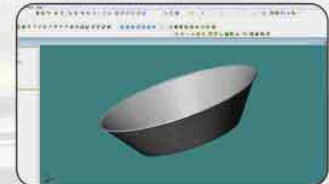

In the year 2010 the firm diversified into Metal Spinning industry and setup a complete line for Metal Spinning and forming of aluminium, steel and stainless steel parts. Today the Firm specialises in supplying metal spun parts to the air movement, blower and ventilation industry. Spun Aluminium parts from the Company are shipped directly to the overseas customers and are used in assembly lines for making Centrifugal Roof Exhausters, Gravity

Vents, Axial Exhaust Fans and Ventilators etc.

FROM CUSTOMER DRAWING TO DEVELOPED PART

Working with Knit Foulds is very simple :

Straight from the customer drawing - we have the capability to offer readymade parts to the customers. We have a complete design, tool room & research centre in-house where we can convert 2D drawings of customers into 3D solid models of components from these. From these solid models we can design and manufacture our own tooling by transferring the solid models to CAM and thereafter, use CNC machines to develop metal spun tooling. From these toolings we can offer complete parts to the customer at a very rapid pace.

PRODUCTION FACILITY -- List Of In-House Equipments

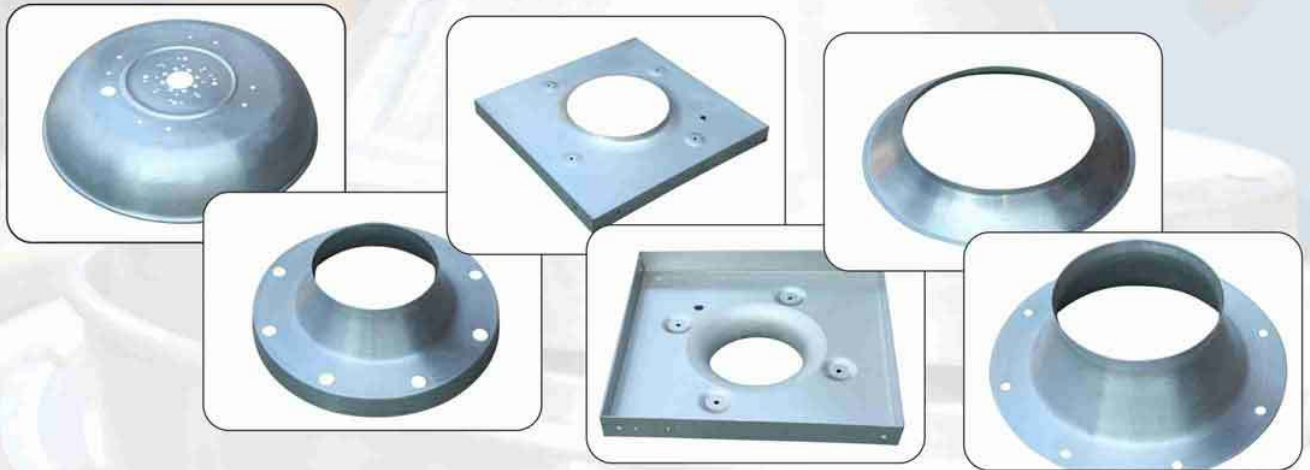

Today spinning is a preferred process, where high productivity excellent quality and low tooling costs are required. For ventilator fans and other ventilation components we have a variety of machines from spinning to flanging and punching machines. The processes are reliable and fast and one single piece can be made in one work step which makes our technology a competitive process compared with other slow and less quality processes.

- Spinning Lathes
- Welding
- Punch Press
- Power Presses
- Bending & Cutting Machines
- Milling Machines
- Lathe Machines
- Shaping Machines
- Galvanising Plants
- Baking Ovens
- Multi Spindle Drilling Machines
- Different SPMs for different operations

PRODUCT RANGE

Today at Knit Foulds we offer a wide range of Metal formed products, each being manufactured and custom designed to meet the specific application needs of the customers. A wide range of top caps, lids, cups, cones, pots, balls, venturiers, baffles, hoppers, exhausts, domes, rings, hemispheres, spare lids and flat cylinders are manufactured in the company. There are several solutions for Fans and blowers, ventilators, bellmouths, exhausters, gravity vents, up blast & down blast centrifugal exhausts, wall & roof ventilators, etc.

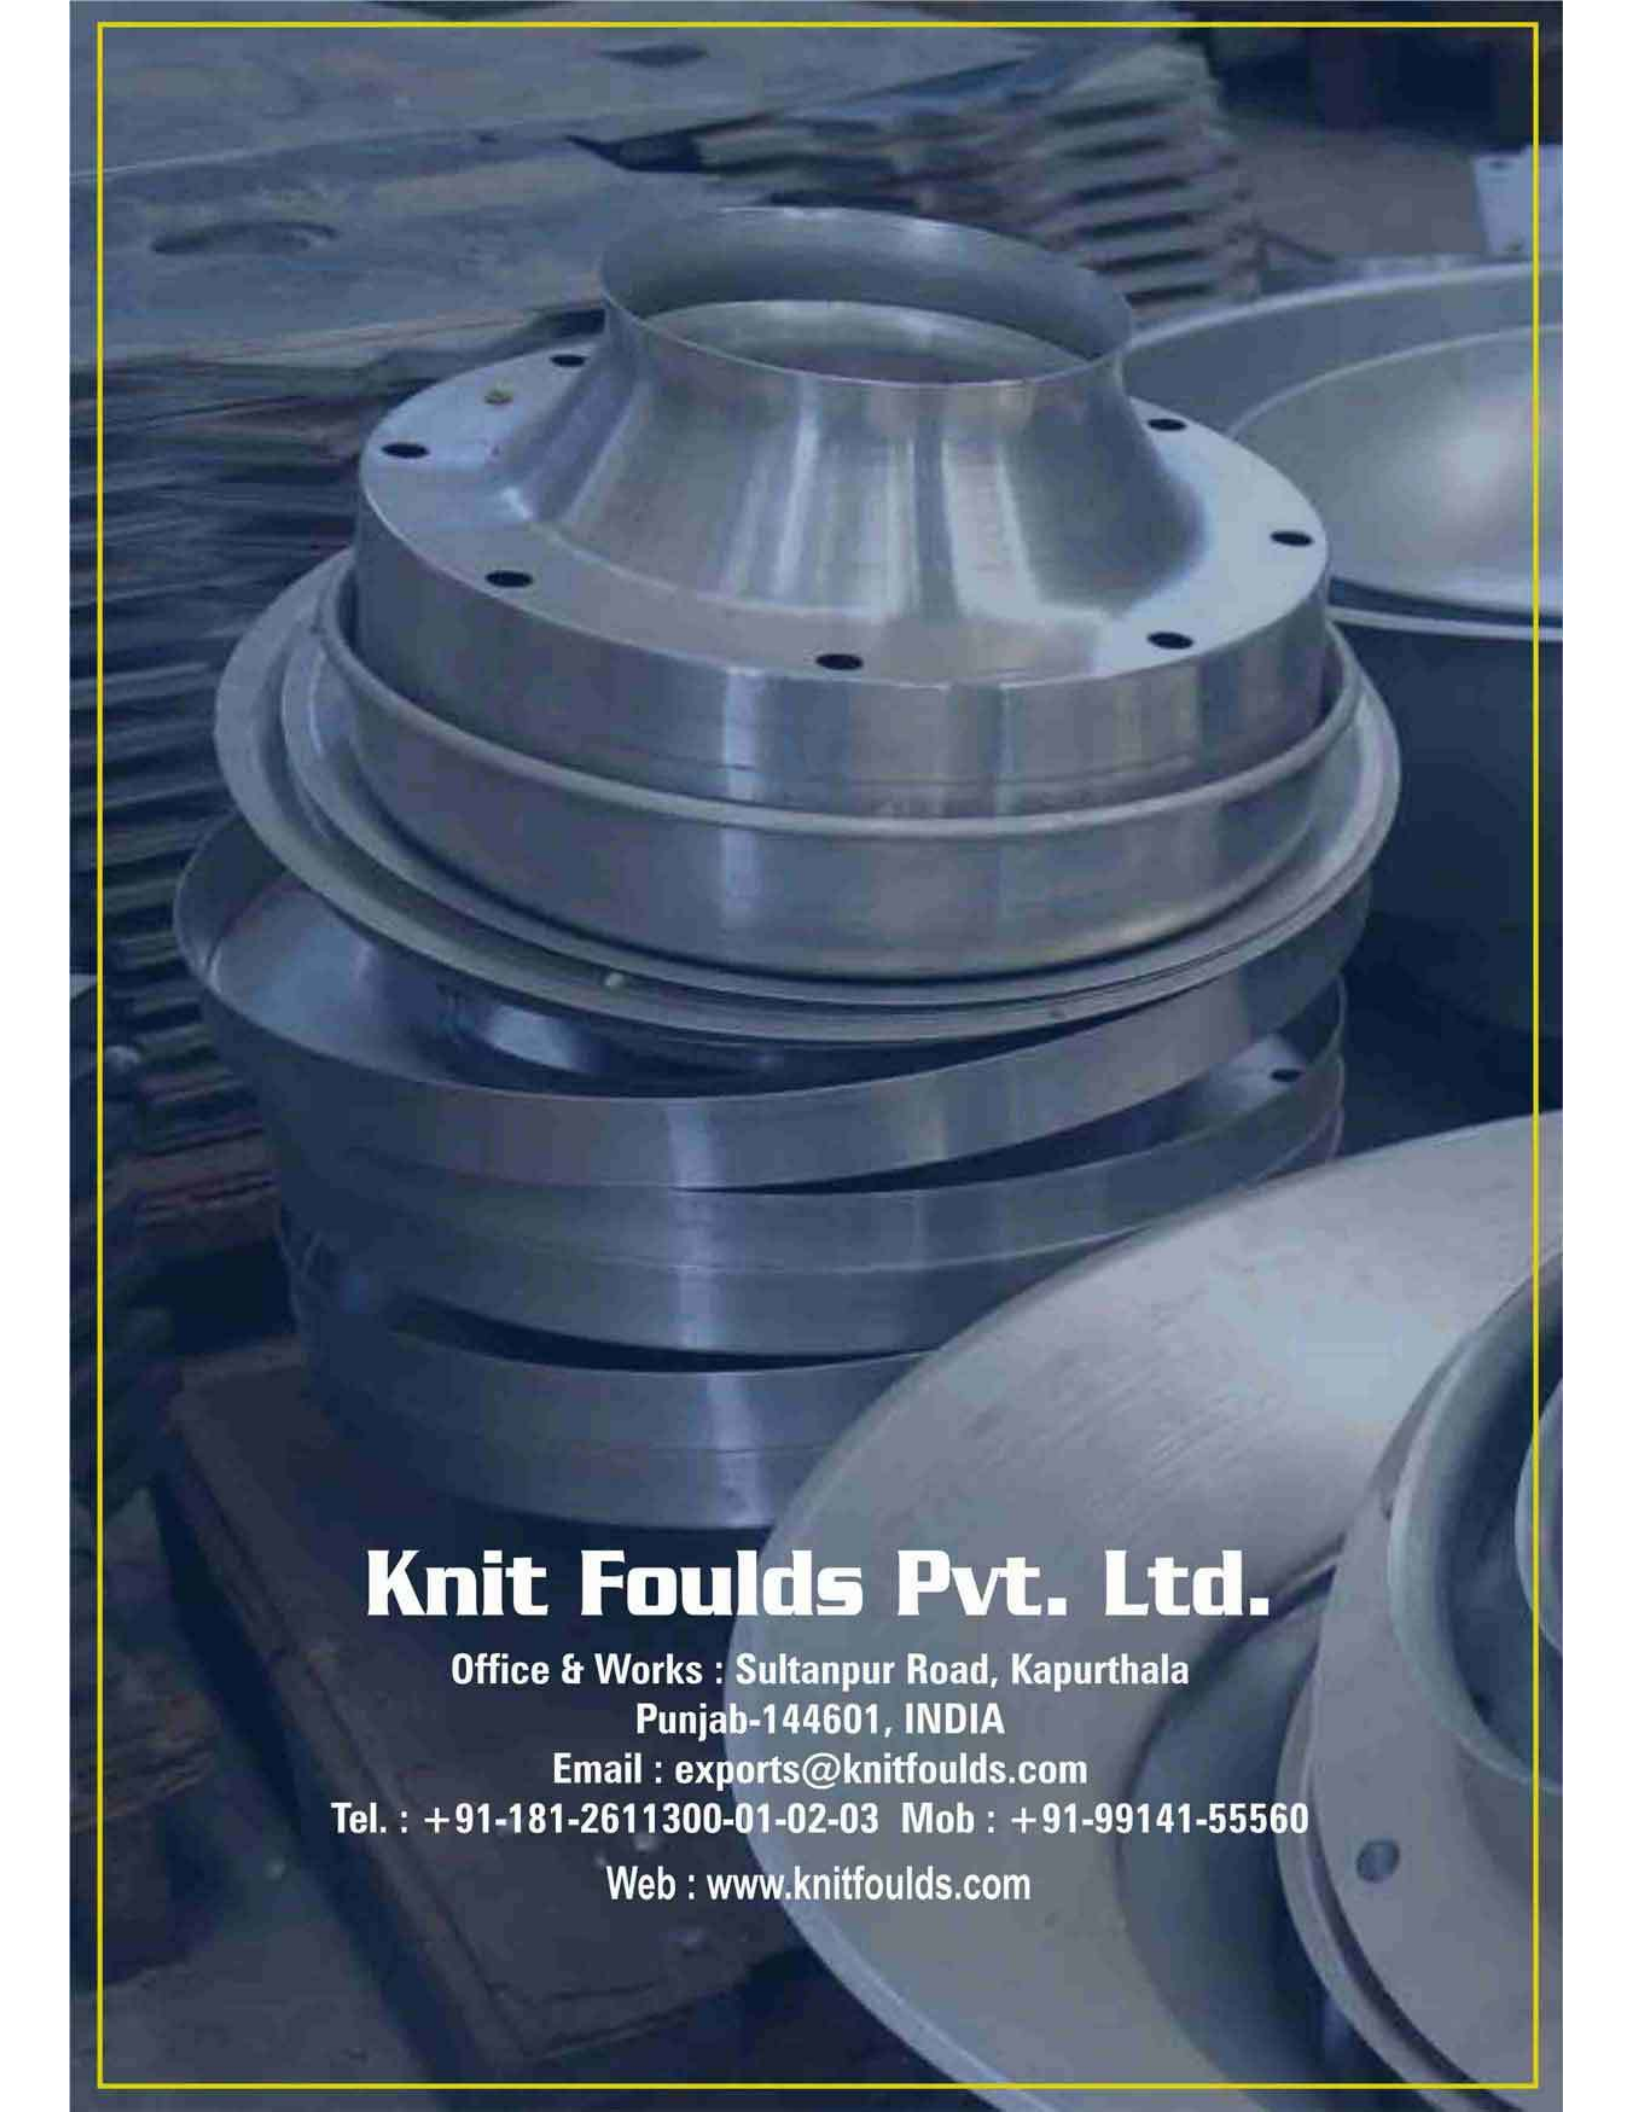

QUALITY Control

"Direct from the factory - straight seamlessly onto assembly" is the motto of the Company !

And a very strong quality control department exists within the company to conduct complete incoming, in process and final quality control. We follow AQL Level II quality control to ensure complete adherence to customer drawings. The strength of the company lies in supplying completely interchangeable parts which can be fitted straight on to the assembly line once they are delivered to our customers manufacturing premises. Our quality control engineers are all highly qualified and adept at adhering to customer requirements and specifications.

Often, it's our extensive capabilities that bring OEMs to our door. But it's our commitment to exceptional quality and unparalleled sales and service that foster long-term relationships. We match our skilled staff and our extensive resources with our customers' needs. Then we do whatever it takes to exceed expectations and solve challenges, serving as partners, crisis managers, and customer service champions to satisfy our customers ever-changing needs.
